Date Coded Chrysler Coils

Chrysler Coils may be purchased direct from M&H

These quality Mopar licensed, American made coils are faithful reproductions of the factory installed ignition coils found on 1966 thru 1971 Chrysler cars. Built using state-of-the-art manufacturing processes, these coils will give years of trouble-free service while maintaining the original look of your vehicle.

Features

- Coils are date stamped with the three digit date code as original
- Over 100 date codes are available to ensure the closest possible match to vehicle
- Part Numbers are stamped in Green ink in the same type style as the original
- Features the correct shaped canister and tower design with fluted style crimp
- Heavy duty primary and secondary windings ensure outstanding performance
- Includes correct nuts and washers
- Custom date codes are also available

Please READ THIS before ordering Date Coded Coils

Restoration Plus Series coils are correct for many 1966 to 1971 Chrysler cars. It is important to note that there were originally two distinct types of coils utilized in these vehicles, each manufactured by a different company. The coil we have reproduced is known by restorers as the "Long Skinny Type" and was manufactured by Essex. The Essex coil features the part number 2444241 and the words Made in USA stamped on the side of it. The Essex coil was used in a good majority of vehicles produced from 1966 to 1971. The other coil that was used was known as the "Short Fat Type" and was manufactured by Prestolite. The Prestolite coil has part number 2444242 on the side of it and the words Made in USA on top of the tower and is not currently being reproduced.

CONTINUED

Correct Tower Design
The tower is shaped just like the original, and features a fluted style crimp as original.

Date Coded
Coils feature a three digit date
code stamped in green. Over 100
date codes are available.

Correct Part Number
Coils are stamped with the correct part number, in the same type style as the original.

Selecting the correct date code

The date code that is stamped on the coil is easy to decode. The first two digits of the date code stamped on the coil indicate the week the coil was manufactured, and the last digit of the date code indicates the year the coil was manufactured. Using a date code of 078 as an example, the 07 would indicate the coil was made during the 7^{th} week of the year and the 8 would indicate it was made in 1968.

If you are fortunate enough to have your original coil simply look to see if the date code is still visible and simply pick the matching date (or one that is as close as possible) from our list of available date codes.

If you do not have an original coil to match from the process is a little more complicated, but not difficult. *In most cases*, all you need to do is subtract 1 to 4 weeks from the build date of your vehicle to determine an approximate date code for the coil. Here's an example:

Year of Vehicle: 1968

Build Date of Vehicle: Mar 1968

A vehicle built in March would have been built sometime between 9th and 12th weeks of the year, lets just assume it was built during the 10th week. The coil that was installed in the vehicle would have been manufactured anywhere from 1 to 4 weeks before that. Based on this example you would choose a date code of 078 from our catalog.

Keep in mind that there is absolutely <u>no</u> way for anyone to know exactly what date code was used in a given vehicle (unless you are fortunate enough to have the original coil). If you are not lucky enough to have your original, then all one can do is approximate by ordering a coil that is date coded 1 to 4 weeks prior to the build date of the vehicle (with some exceptions).

You may have noticed that we allude to the fact that there are some exceptions to determining proper date codes. Some special vehicles (i.e. limited production) and HEMI equipped vehicles <u>may</u> have been equipped with a date code that was dated more than 4 weeks prior to the production date of the vehicle. If you believe you have one of these special vehicles or a HEMI equipped vehicle (and the proper date code is imperative to your restoration) you will want to call and speak with Frank Badalson at Auto Restoration Parts (804) 275-2155. For a small fee Frank will get the details about the car and determine the proper date code that is necessary for the restoration to be correct.

F.A.Q.'s

What if I don't know the build date of my vehicle?

Determining the build date of some Chryslers can be a very complicated process and one that we don't have room here to cover. Please call Frank Badalson at Auto Restoration Parts (804) 275-2155 if you need to find out a vehicles build date. For a small fee Frank will get the details about the car, let you know a probable build date and determine the proper date coded coil you need. As an alternative, there are books published on build dates and VIN identification that you can order from Chrysler restoration parts suppliers.

Is the lettering "CH412" stamped on the coils?

Yes, but only when applicable. All coils prior to date code 018 have "CH412" stamped on them. You'll find a note in our catalog descriptions indicating "CH412" on any coil that features the additional "CH412" lettering/stamping.

What were the cut-off dates for vehicle production?

Vehicle production for a given year was typically August 1st to July 31st (with some deviation).

You don't list the particular date code I am looking for?

Essex, Chryslers original coil supplier made coils every week of the production year and the coils were stamped accordingly with 52 date code combinations per year. We have chosen to consolidate the date code stamps to every three weeks in order to keep the project economically viable. We do offer a selection of Non-Standard date codes. The Non-Standard date coded coils are non-returnable and require a 4 to 6 week lead time.
